UML 2.5 Diagrams Overview A UML diagram is a partial graphical representation (view) of a model of a system under design, implementation, or already in existence. UML diagram contains graphical elements (symbols) - UML nodes connected with edges (also known as paths or flows) - that represent elements in the UML model of the designed system.

UML 2.5 Diagrams Overview

1.3.2 Abstraction and Modelling 1 Abstraction is about 1. Looking at things in detail 2. Looking at relevant information only 3. Focusing on one detailed point 2 Hiding details is a good idea because 1. There is no need to worry about them as they are unnecessary 2. Details are not important 3.
